

GRESSO

Avantgarde Black Diamonds.

Gresso is proud to introduce the most exquisite version of Avantgarde Collection - Black Diamonds.

Black Diamonds Collection is a perfect blending of the most precious materials: African Blackwood, which age is more than 200 years, and excellent black diamonds encased in 18K gold.

The originality of this collection is the exclusive design of keyboard. Function keys are executed of gold and encrusted with magnificent and rare black diamonds, each of 0,11K.

Black Diamonds collection will be available in two models: **Black Diamonds** и **Royal Black Diamonds**.

Royal Black Diamonds.

23 function keys are executed of gold and encased with black diamonds of 2,53K. The front panel is embellished by a triangle inset of gold - one of special aspects of all Gresso mobile phones. The back panel is decorated with Gresso logo executed of gold. Because of rarity of black diamonds, this collection will be launched in a limited edition of **50 pieces**. The price - 30000 Euro.

Black Diamonds.

Navigation keys are made of gold and paved with 4 black diamonds totalling 0,44K. Other function keys are made of gold using ultra-precision turning technology. This technology, unique for the jewellery industry, ensures a superlative degree of precision of each detail. The front panel is embellished by a triangle inset of Gold. The back panel is decorated with Gresso logo executed of gold. The price - 9000 Euro.

The collection will be launched on December, 2007.

Design and Materials

- Avantgarde Black Diamonds Collection is made of African Blackwood, which age is more than 200 years. Function keys are executed of gold and encrusted (set, paved) with black diamonds, each of 0,11K. The case of Gresso Avantgarde is manually manufactured and fastened with gold screws.
- The back cover of the phone is executed of stainless steel with a titanic covering and hand polished to a mirror shine. This covering offers protection against scratches and is very durable.
- Another technical feat of accomplishment is the magnetic lock of the battery cover. This constitutes a double advantage, at once both an improvement in the reliability of fastening and in its ease of use.

GRESSO

Display

- Sapphire crystal glass of 42 K frames the screen.
- TFT display, 65K colors, 240*320 pixels

Keyboard

- Special scratch-resistant titanic covering of the keyboard. Figures and letters of the keyboard are cut out by the laser.
- A special feature is the keyboard with Roman numerals. This is also an innovation by Gresso. No phone had ever been designed this way..
