

GRESSO

## Gresso Avantgarde Skeleton. The only one...

**Gresso Company is proud to introduce a true breakthrough collection - Avantgarde Skeleton. Gresso Skeleton is a great innovation in mobile phone design, made in a limited edition of just 15 pieces.**

For the new model Gresso drew inspiration from complicated Swiss Skeleton watches, which allow to view the complete movement of the piece in all its perfection. Similarly to that of Skeleton watches the back panel of the new model is executed of hand-polished sapphire crystal of 42K.

In creating the Avantgarde Skeleton, Gresso employed the outstanding traditions of watchmaking and jewelry art, as well as achievements of aero-space technologies.

The case of the phone is executed of special titanium alloy which has been used originally in space industry only. Titanium is known as a metal, which combines hardness and immutability with extreme lightness. It has the virtues of being hypo-allergenic and resistant to temperature and corrosion, but it requires a very much more complex specialist surface finishing process.

The unique feature of Gresso Avantgarde Skeleton is the scratch-proof high-tech ceramic coverage. This is the material of which the high temperature protection on spaceships is made. Ceramics' solidity is second to that of diamond only.

23 functional keys and the triangle on the front panel are executed of aircraft steel. The sapphire glass on the back panel is decorated with the Gresso logo covered with 10 micron gold. Roman numerals on the keyboard are an innovation by Gresso. Another invention patented by the company is the magnetic lock of the battery cover. The cover is executed of stainless steel and decorated with genuine leather.

Gresso allows no compromises between luxury and functionality. This model is destined for those who have achieved everything and are accustomed to make great demands of life. The gadget is provided with

**GRESSO**
